

Product Matrix

Features/Applications	Personal Edition	Design Edition	Team Edition	Enterprise Edition
Unlimited model size (limited by your computer resources).		✓	✓	✓
Advanced 3D modeling/animation with built-in interface to the expansive Google Warehouse graphics library.	✓	✓	✓	✓
Rapid modeling of complex workflows using the Standard Object Library.	✓	✓	✓	✓
Advanced material handling including accumulating/fixed conveyors and on-demand/fixed route vehicles.	✓	✓	✓	✓
Flexible resource modeling including moveable workers, dynamic selection rules, and flexible work schedules.	✓	✓	✓	✓
User-defined relational data tables for interfacing to enterprise data.	✓	✓	✓	✓
Support for 3rd party add-ins such as optimization (OptQuest).	✓	✓	✓	✓
Advanced experimentation, analysis, and reporting features for defining scenarios and interpreting results.	✓	✓	✓	✓
Serve as Full Runtime software for models created in Design or Team Edition.		✓	✓	✓
View custom dashboard results created by others.	✓	✓	✓	✓
Share the software between multiple users via a floating license. (Option)		✓	✓	✓
Graphically create processes for unlimited modeling of complex modeling situations.	✓	✓	✓	✓
Combine objects and processes within a model to customize object behavior.	✓	✓	✓	✓
Create and use custom object libraries for specific application areas.		✓	✓	✓
Create models for use with Interactive Runtime using the free Simio Personal Edition.			✓	✓
Create custom dashboard reports for others to use.			✓	✓
Distribute scenarios and replications across other computers in your workgroup.			✓	✓
States and Targets in tables support incorporation of output data into tables.				✓
Resource and Entity Gantt charts to graphically illustrate resource usage and constraints over time.				✓
User-definable Targets with both deterministic (plan) and stochastic (risk) analysis.				✓
A Constraint Log to aid in identifying bottlenecks and determining how best to improve a facility's operation.				✓
Has option to load with a simplified UI for use with deployment to schedulers.				✓
Supplement standard reports like Resource Dispatch with custom dashboard reports on planning data.				✓
